

Aerial Lift Training Saskatchewan

Aerial Lift Training Saskatchewan - The mechanical access platform referred to as an aerial work platform is a machinery which provides access to areas that are otherwise not accessible to individuals and other machine. Also called an aerial device or elevating work platform, the device is often used to be able to access high areas. Construction and maintenance workers usually must utilize aerial work platforms on the job. They are used by firefighters for emergency access.

The aerial work platform is intended to temporary application, providing access to high places. They are intended to be operated by one person, with the capability of lifting weights of less than one ton. Several types have load limits which are higher. There are various types of aerial work platforms; for instance, there is a "cherry picker" and a "scissor lift".

Various aerial work platforms come outfitted with electrical outlets or compressed air connectors for power tools. For specialist jobs, such as lifting frames for window glass, an aerial work platform can come with special tools.

Anybody required to operate an aerial lifting machinery requires training, together with their superiors. Members of Health & Safety Committees and representatives responsible for inspecting aerial device work places also must go through training. Trainees will learn aerial lifting device operation. They will also learn the regulations which apply to the safe operation of these machines. Regulations differ from province to province, and within worksites which are federally regulated.

Anybody who is needed to be lifted by or work near an aerial lifting device should be told concerning possible hazards. An Aerial Lift Training Video could be shown in a general safety session to educate all of the workers who are lifted by them or work near them.

Aerial Lift Training Program includes modules focused on the following: Aerial Lift Devices and Operating Controls; Hazard Identification; Pre Operational Checks for Aerial Lift Devices; and Platform Positioning & Park Positioning. The program is meant to train staff on the safe use of self-propelled, elevated work platforms and boom supported, self-propelled, elevated work platforms. Employees who finish the program would be given a certificate, signed by somebody qualified to be able to verify successfully finishing a hands-on practical exam.
