

Clark Forklift

Clark Forklift Forklift Training - Presently, there are over 350,000 Clark lift trucks performing worldwide, and in excess of 250,000 operating in North America alone. With five main lines across the globe, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, covers more than 120,000 individual parts intended for 20 distinctive brands of lift trucks and automated equipment. Your local Clark Supplier is your total source for availability of all your components requirements supplied by Clark Totalift.

Clark features a extraordinary Parts Supply team. The parts warehouses are conveniently situated in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their customers and their dealers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Motivated to provide the highest level of value and service to our users, Clark remains on the cutting edge when it comes to improving output and benefiting performance.

Globally, Clark has one of the most outstanding supplier support networks. With over 550 locations globally, seller representation in over 80 nations and 230 locations in North America, their high level of commitment to their clients predominates the materials handling market.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of modernization in the industrial equipment and automated forklift industry. This exceptional commitment to safety is currently a customary feature on every lift truck.

Clark has a relentless goal to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be globally certified with quality standard ISO 9001 in all of its manufacturing facilities. Also, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any number of environmental limitations, thus placing them in a dominant industry position.

Lean Production

Clark has selected the very economical and beneficial system of "Lean Production" for its assembly plants and use of resources. This structure was developed to acknowledge the most successful approaches of manufacturing facility management and ensuring maximum proficiency. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Engineering

Clark's product engineers and suppliers communicate together to upgrade the effectiveness and brilliance of their merchandise while minimizing costs. The contemporary value engineering agenda combines progressive product development and provides improved customer support and service within the industry.
