

JLG Telehandler

JLG Telehandler Training Saskatchewan - In the late 1960's John L. Grove, with his wife Cora started out on a cross country trip in their RV. Freshly retired, after spending many years working with his brother to build their crane company into an market leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

Whilst on their journey, John spent time talking to former business associates whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered an infinite market for a product that could swiftly and safely lift people in the air to accomplish upkeep and other building services.

Following their return from vacation, John set up a partnership with two of his friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design essentials of that original lift into current models.

JLG forklifts have come a long way since Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. Today, the business proudly continues to expand itself into different marketplaces globally and develops new products to ensure clients are capable of being more effective and perform in the workplace within a safer environment.
